

## The Spectrum Low Volatility Fund Update

### Fund Commentary

As widely anticipated, the Federal Reserve cut the Federal Funds Rate by 25 basis points, placing the target policy rate range between 4.00%-4.25%. Additional rate cuts are anticipated, though Chair Powell has stated it is not a certainty and will be data dependent. Treasury rates had been trending lower in the months ahead of this cut, leaving the bond market in September with little in the way of major adjustment. As such, most bond classes were relatively steady, with favorable trends intact. The uptrend in high yield bonds now have compressed spreads to a level that warranted a mild decrease in exposure in the Spectrum Low Volatility Fund (SVARX). Improved momentum and trends led to a rotation into municipal bonds. Other categories such as floating rate, mortgaged-backed, and preferred stock had steady exposure during the month.

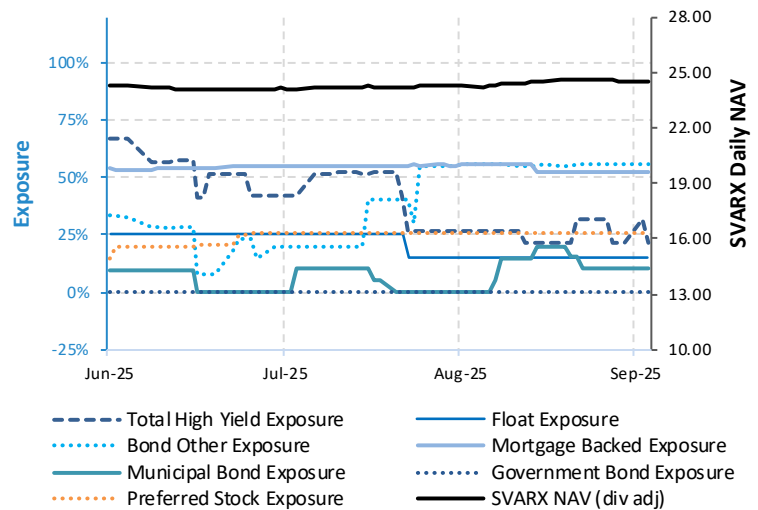

### Portfolio Allocation

	8/31/2025	9/30/2025
High Yield Bond	26.68%	21.61%
Mortgage-Backed	55.52%	52.56%

Municipal	0.00%	10.17%
Government	0.00%	0.00%
Preferred	25.89%	26.17%
Floating Rate	15.38%	15.40%
Bond Other	55.46%	55.87%

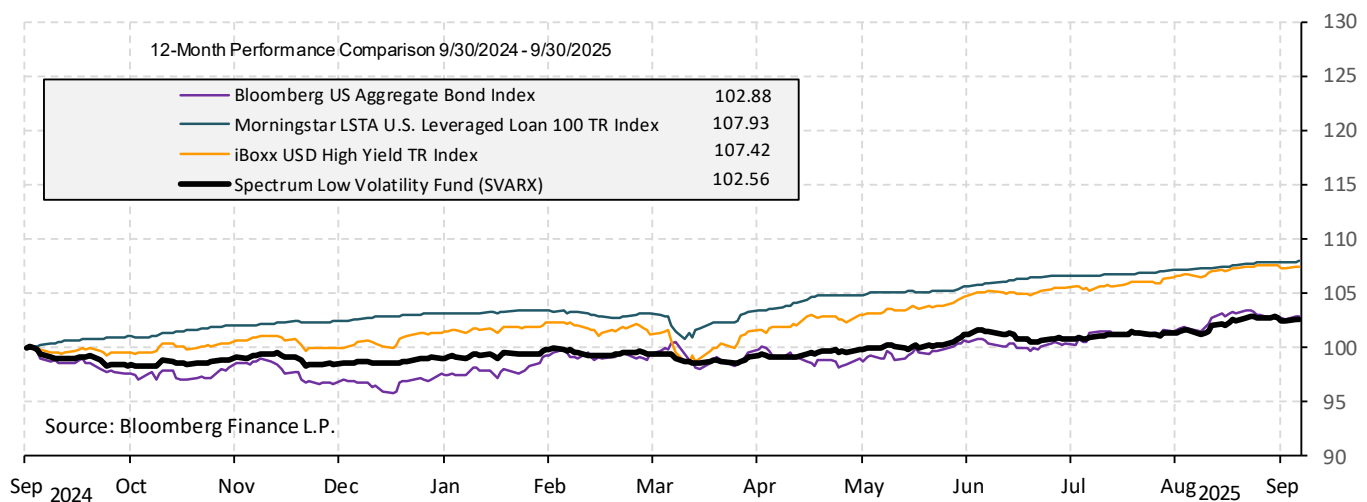

Can contain derivatives and/or short positions

**178.93%**      **181.78%**

### Exposure Allocation (6/30/2025 - 9/30/2025)

### SVARX (Fixed Income) vs. Sector Indices

The chart above shows how the Fund performed against related sector indices for the past 12 months. The Fund focuses on domestic fixed income and credit markets, but can invest globally when prudent. The management team navigates the various bond classes and their specific characteristics. Various bond classes tend to move in different directions from each other, as some tend to perform better when there is economic growth while other classes perform better during times of heightened instability. The Fund's holdings and exposure can shift on a daily basis allowing it to be nimble. Spectrum's core philosophy is to achieve competitive returns without sacrificing the goal of risk management.
