

The Spectrum Low Volatility Fund Update

Fund Commentary

Geopolitical turmoil in the Middle East created significant headwinds for markets in March. The surge in oil prices brought renewed inflationary concerns and fears of economic slowdown. The Federal Reserve held rates steady following its FOMC meeting, while investors expressed concern that the Fed may alter pace or course regarding interest rate policy. The Spectrum Low Volatility Fund (SVARX) took defensive measures, sharply reducing exposure versus prior month levels. Positions in global bonds, municipal bonds, and preferred stock investments were sold to cash as other areas including multi-sector bond investments were trimmed. Exposure increased modestly very late in the month as the bond market displayed clues of stability and sentiment extremes. SVARX closed the month with a relatively defensive stance as fragile market trends continue to be monitored.

Portfolio Allocation

| | 2/28/2026 | 3/31/2026 |
|----------------------|-----------|-----------|
| High Yield Bond | 10.44% | 9.95% |

SVARX (Fixed Income) vs. Sector Indices

The chart above shows how the Fund performed against related sector indices for the past 12 months. The Fund focuses on domestic fixed income and credit markets, but can invest globally when prudent. The management team navigates the various bond classes and their specific characteristics. Various bond classes tend to move in different directions from each other, as some tend to perform better when there is economic growth while other classes perform better during times of heightened instability. The Fund's holdings and exposure can shift on a daily basis allowing it to be nimble. Spectrum's core philosophy is to achieve competitive returns without sacrificing the goal of risk management.
