A Non-Indexed Investment Solution with Equity and Limited Bond Exposure

The Spectrum Active Advantage Fund is designed and managed using proprietary investment and trading strategies developed by the investment team at Spectrum Financial, Inc., an RIA that has been managing client assets since 1988. The Spectrum Active Advantage Fund (SAPEX) originated in 2015, and is an adaptive equity fund focused on generating alpha through broad equity exposure in addition to diversifying its holdings with fixed income to boost or buffer equity returns, providing the investor with streamlined diversification.

The Fund benefits from the investment philosophy that the Spectrum team has molded and shaped over the last 30+ years. Identifying, quantifying, and understanding the current market environment through price analysis allows a portfolio to favorably react to current trends happening in the market. Spectrum is the preferred advisor when it comes to understanding market opportunities, risk management per individual sector, and overall risk adjusted returns.

2021, 2020 & 2019 Lipper Fund Award Winner

The Spectrum Active Advantage Fund (SAPEX) received the Lipper Award for Best Fund Over 3 years in the Absolute Return Funds category.

The Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Lipper Fund Award.

The currency for the calculation corresponds to the currency of the country for which the awards are calculated and relies on monthly data. Classification averages are calculated with all eligible share classes for each eligible classification. For more information, see lipperfundawards.com. Although Lipper makes reasonable efforts to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Lipper.

Lipper Leaders fund ratings do not constitute and are not intended to constitute investment advice or an offer to sell or the solicitation of an offer to buy any security of any entity in any jurisdiction. As a result, you should not make an investment decision on the basis of this information. Rather, you should use the Lipper ratings for informational purposes only. In addition, Lipper will not be liable for any loss or damage resulting from information obtained from Lipper or any of its affiliates.

An investor should carefully consider the investment objectives, risks, charges, and expenses of this fund before investing. To obtain a prospectus, please call 1-855-582-8006. The prospectus and summary prospectus should be read carefully prior to investing. There is no guarantee that the fund will achieve its investment objectives.

For Financial Professional Use Only. Not For Public Distribution.

Created From 33 Years of Spectrum's Active Management

- **Objective:** long-term capital appreciation, positive alpha generation, and managed return volatility.
- **Adaptive Equity Fund:** An adaptive equity fund focused on generating alpha over the long-term through broad equity exposure in addition to diversifying its holding with fixed income to boost, or buffer, equity returns providing the investor with streamlined diversification.
- **Track Record:** The Fund has a 5+ year track record and an overall 2-Star Morningstar Rating as of 9/30/2025 in its Tactical Allocation Fund Category. The investment team has been managing assets since 1988, through all types of market environments. (please see disclosures below)

Confluence of Evidence: Strategy Execution

Management overlay allows the portfolio team to make final buy/sell decisions, instead of decisions being made automatically by black box models.

A Non-Indexed Investment Solution with Equity and Limited Bond Exposure

As tactical fund managers, Spectrum strives to provide value in its active management of the public markets. The focus of the Spectrum Active Advantage Fund is to provide opportunistic access to two major broad market categories: equities and bonds. With a short to intermediate term outlook driven by price analysis, the Fund attempts to be exposed to more positive market periods than negative ones.

EQUITY EXPOSURE

The Spectrum Active Advantage Fund is a fund that focuses on capturing broad equity exposure. The Fund has the ability, depending on market conditions, to be 0-100%+ long equities through future contracts, limited individual stocks, and ETFs. At this point in time, the fund does not go net short as an investment strategy.

Effective Cash Management

The Spectrum Active Advantage Fund additionally accesses the bond market in order to manage excess cash in the fund, efficiently. The Fund has the ability, depending on market conditions, to be 0-50%+ long bonds via liquid fixed income instruments: ETFs and mutual funds. At this time, the Fund does not go net short as an investment strategy.

Gaining Broad Market Equity Exposure Through Opportunistic Positions

The fund attempts to capture positive alpha through the types of securities selected and their subsequent position size. The Active Advantage Fund primarily uses managed futures, ETFs and a select amount of individual stocks to access equity exposure, with a focus on securities that we believe have the highest probability of success. The fund takes into account short to intermediate-term timeframes in its analysis which provides a “common sense” layer to investment decisions.

Compensating Risk with Returns

The Spectrum Active Advantage Fund has historically lower beta than the benchmark.

Total Return Performance & Beta Comparison of Spectrum Active Advantage Fund vs. New York Composite TR Index

† June 2018 — September 2025

Inception Date: 06/01/2015; Expense Ratio: 1.99%

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reimbursement of any dividend and/or capital gains distributions. To obtain performance data current to most recent month-end, please call toll free 1-888-572-8868.

† Source: Bloomberg Daily Data as of 9/30/2025. The beta is based off a 3-year calculation compared to the New York Stock Composite TR Index, and therefore June 2018 is the earliest date to use. **Beta:** a statistic that measures volatility of the fund, as compared to that of the overall market. The market's beta is set at 1; a higher beta than 1 is considered to be more volatile than the market, while a beta lower than 1 is considered to be less volatile.

For Financial Professional Use Only. Not For Public Distribution.

Compensating Risk with Returns

The Spectrum Active Advantage Fund has shown the ability to create alpha over the benchmark index during trend-able periods in the market.

Total Return Performance & Alpha Comparison of Spectrum Active Advantage Fund vs. New York Composite TR Index

† June 2018 — September 2025

Inception Date: 06/01/2015; Expense Ratio: 1.99%

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reimbursement of any dividend and/or capital gains distributions. To obtain performance data current to most recent month-end, please call toll free 1-888-572-8868.

† Source: Bloomberg Daily Data as of 9/30/2025. The alpha is based off a 3-year calculation compared to the New York Stock Composite TR Index, and therefore June 2018 is the earliest date to use. Alpha (α), used in finance as a measure of performance, is the excess return of an investment relative to the return of a benchmark index.

Portfolio statistics are based on 5-year calculations from Morningstar, FastTrack Data, and Bloomberg.

Standard Deviation: is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility. It is a measure of the dispersion of a set of data from its mean. **Sharpe Ratio:** a risk-adjusted measure calculated by dividing a fund's annualized excess returns over the risk-free rate by its annualized standard deviation. The higher the Sharpe ratio, the better the fund's historical risk-adjusted performance. **Beta:** a statistic that measures volatility of the fund, as compared to that of the overall market. The market's beta is set at 1; a higher beta than 1 is considered to be more volatile than the market, while a beta lower than 1 is considered to be less volatile. **R-Squared:** a measurement of how closely a fund's performance correlates with an index. It can range between 0 and 1. An r-squared of 1 indicates perfect correlation, while 0 indicates no correlation.

Lead Portfolio Manager & CEO

Ralph Doudera

Ralph Doudera is the CEO and head portfolio manager of Spectrum Financial and the Spectrum Funds. Ralph Doudera has been in the investment industry since 1973. In addition to Spectrum Financial, Ralph is also a Managing Member of Hundredfold Advisors, LLC and the portfolio manager for the Hundredfold Funds.

Consider these risks before investing: Bond risk, derivatives risk, equity risk, inverse ETF risk, junk bond risk, leverage risk, management risk, market risk, mutual fund and ETF risk, short position risk, small and medium capitalization risk, and turnover risk. There is no guarantee the fund will achieve its investment objective. You can lose money by investing in the fund. Please carefully review the prospectus for detailed information about these risks.

BENCHMARK DATA:

- **New York Stock Exchange Composite TR Index:** The NYSE Composite Index (NYATR) measures the performance of all stocks listed on the New York Stock Exchange. It includes more than 1,900 stocks, of which over 1,500 are U.S. companies. Its breadth therefore makes it a much better indicator of market performance than narrow indexes that have far fewer components. The weights of the index constituents are calculated on the basis of their free-float market capitalization. The index itself is calculated on the basis of price return and total return, which includes dividends.
- **S&P 500 TR Index** is a capitalization weighted index of 500 stocks representing all major domestic industry groups. It is not possible to directly invest in any index. The S&P 500 TR assumes the reinvestment of dividends and capital gains.
- **S&P MidCap 400 TR Index** tracks the performance of 400 mid-sized U.S. companies. These companies typically have a market capitalization of between \$2 billion and \$10 billion. The S&P 400 TR assumes the reinvestment of dividends and capital gains.
- **NASDAQ 100 TR Index** a modified market cap-weighted index that includes 100 of the largest domestic and international non-financial securities listed on NASDAQ based on market cap. The Index reinvest cash dividends on the ex-date.
- **Russell 2000 Small-Cap TR Index** measures the performance of the small-capitalization sector of the U.S. equity market.

Please see the following page for full disclosures

© 2025 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Ratings does not include any adjustments for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar Rating for the Hundredfold fund is for the Institutional share class only (HFSAX); other classes may have different performance characteristics. No compensation was given for ratings.
